

Task 10: Predictive Validation -- Mechanistic Summary

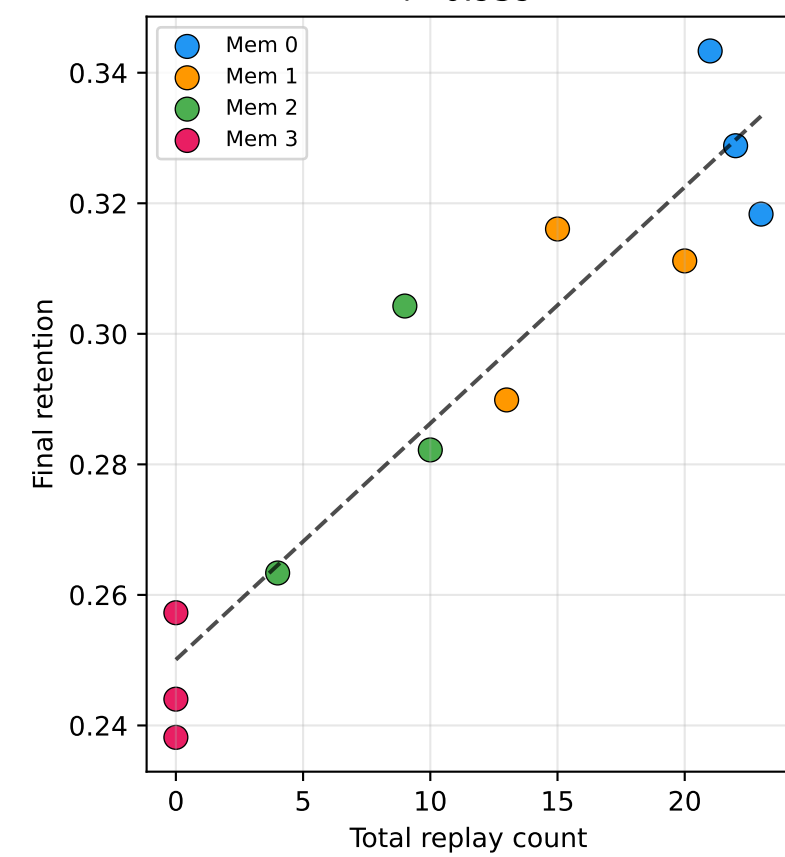

A. Replay event sequence

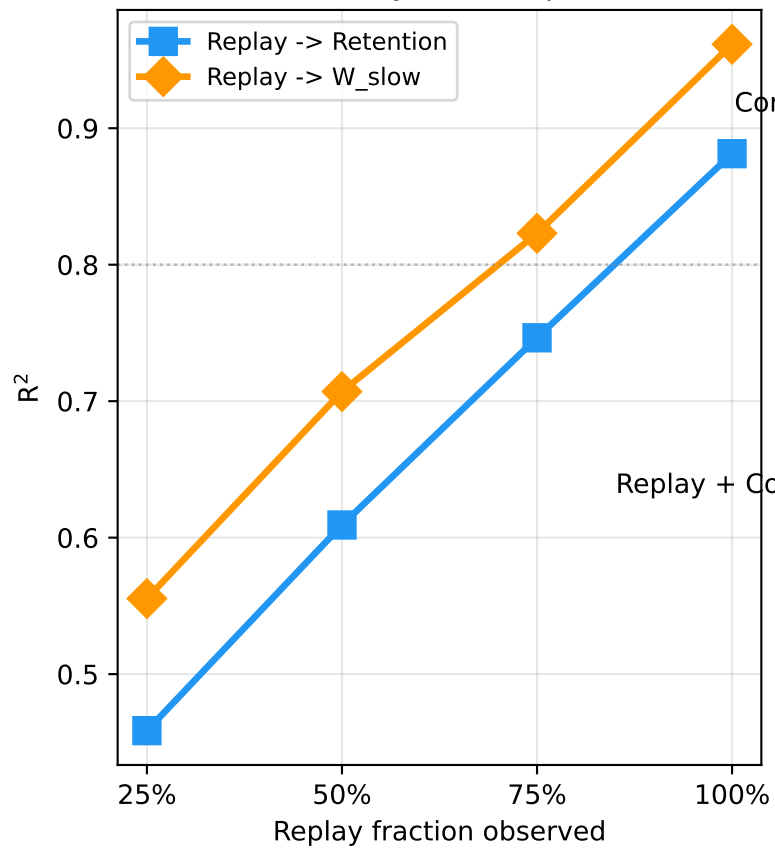

B. Core participation trajectory

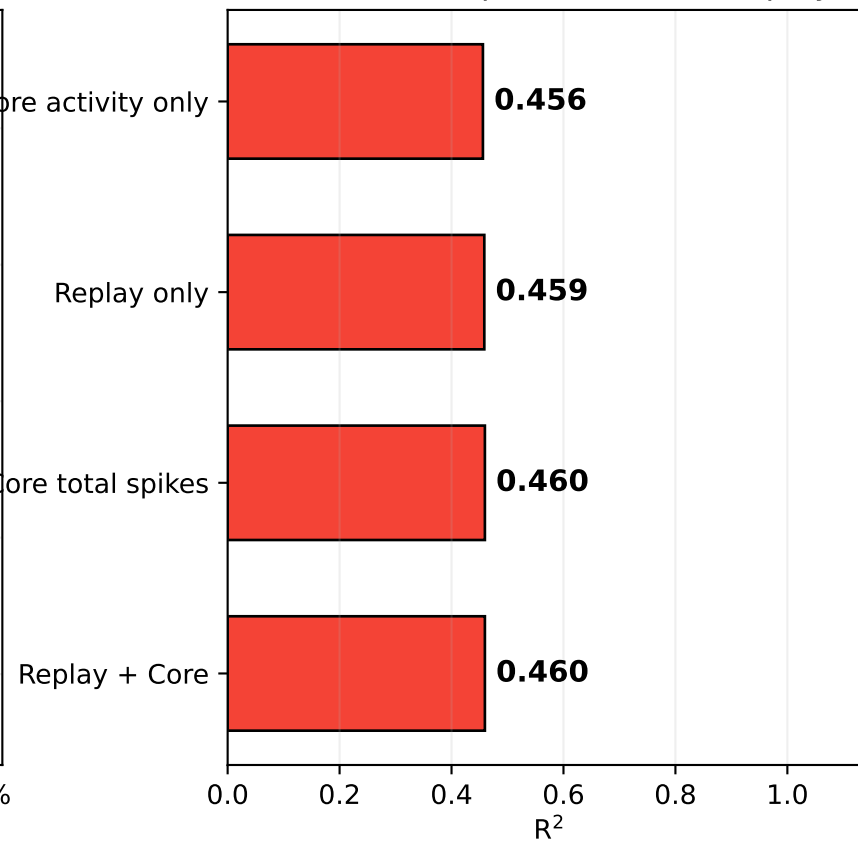

C. Replay count vs Retention
 $r=0.939$

D. How early can we predict?

E. Model comparison at 25% replay

VERDICT: B

Early replay PARTIALLY predicts consolidation

25%: $R^2=0.459$, 50%: $R^2=0.609$

Core question answer:
At 25% replay, $R^2=0.459$
At 50% replay, $R^2=0.609$
