

Task 2 Master Summary: Schema Metrics Across All Conditions

Wcc and S1 track retention; RS is scale-invariant and insensitive to ablations

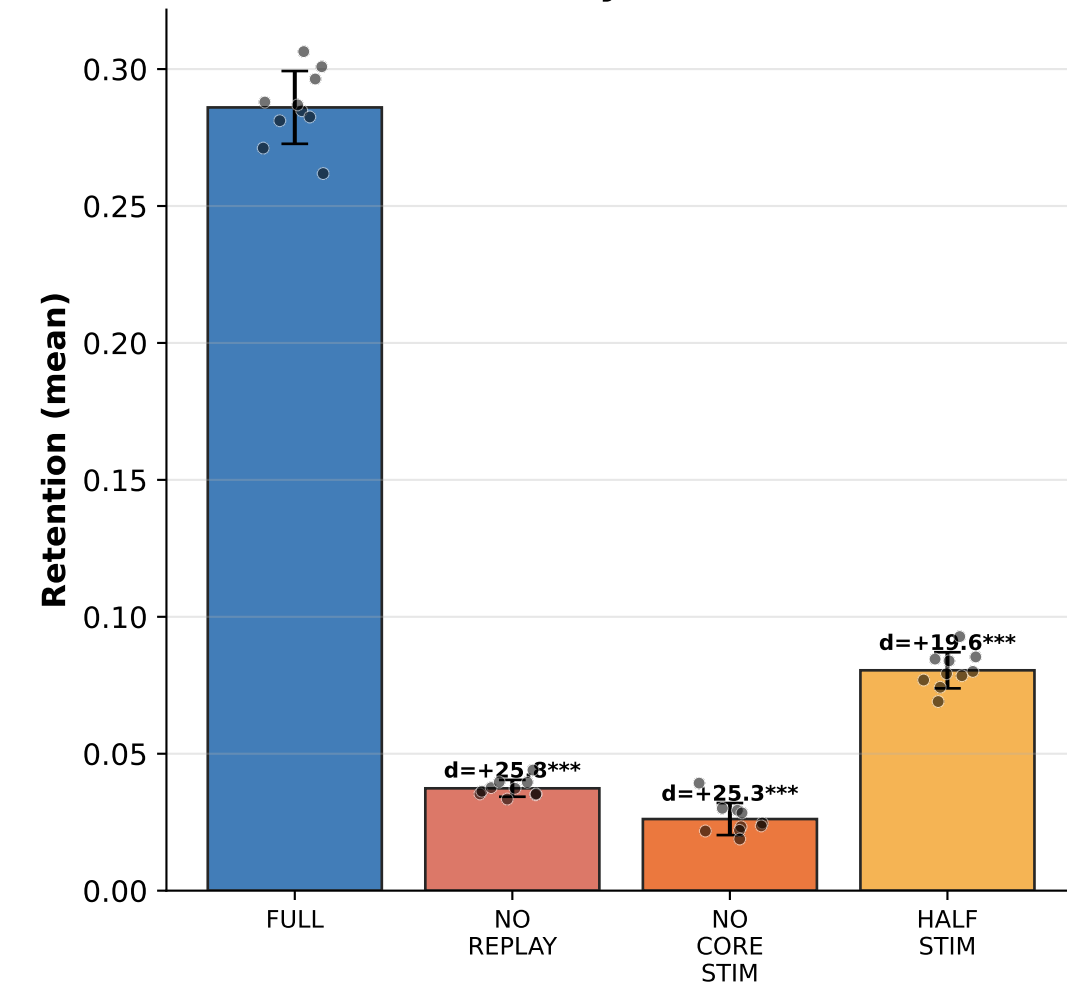

A. Schema Strength (Wcc)

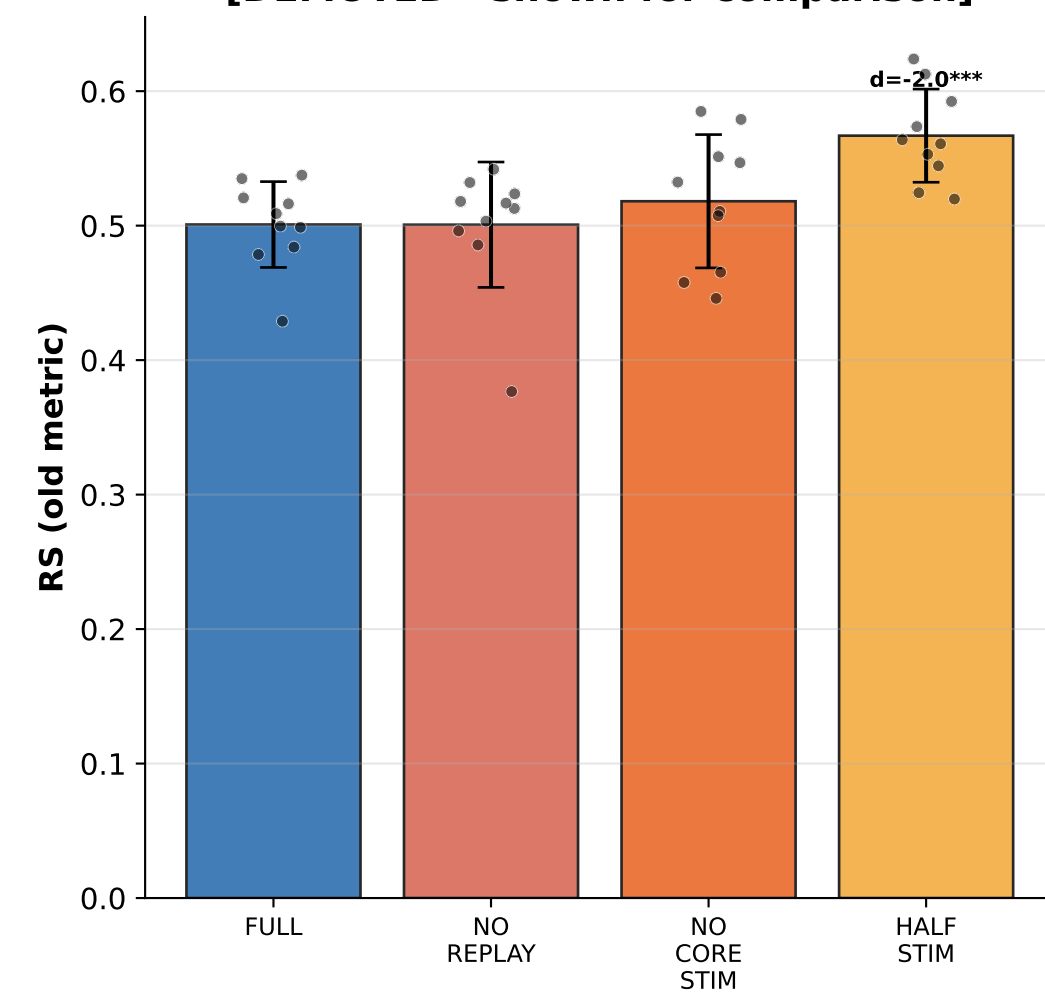

B. Schema Asymmetry (S1)

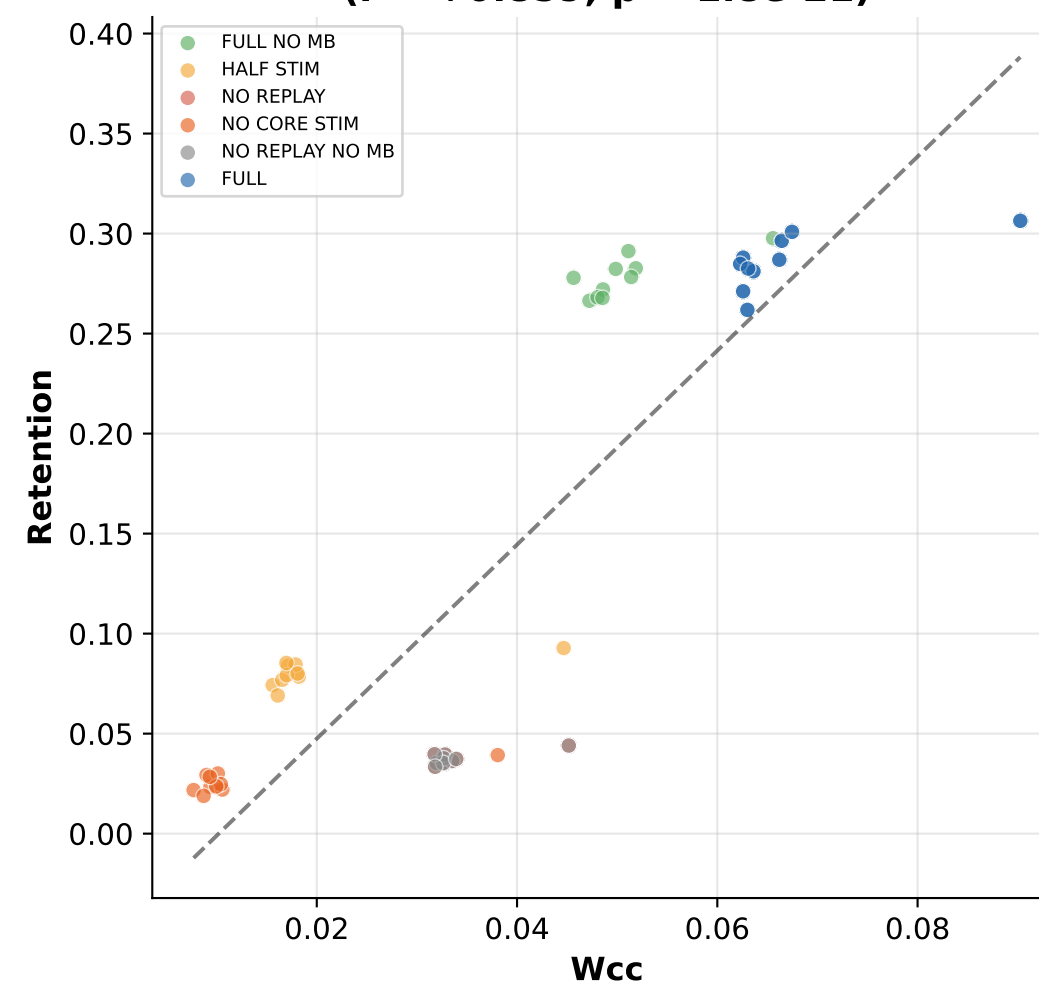

C. Memory Retention

D. RS (scale-invariant ratio) [DEMOTED - shown for comparison]

E. Wcc predicts Retention ($r = +0.859$, $p = 1.8e-21$)

F. RS does NOT predict Retention ($r = -0.403$, $p = 5.5e-04$)
